SKILL

- **Languages**: Java, C++, Python, JavaScript, C, HTML, CSS, SQL
- **Frameworks**: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, React.js
- **Tools**: Power BI, Git & GitHub, MySQL, Docker, AWS, Linux
- **Core Competencies**: Data Structures & Algorithms, Computer Networking, Data Processing and Analysis
- **Soft Skills**: Problem-Solving, Adaptability, Time Management

PROJECTS

AI Driven Tumor Detection from medical Scans| Link Oct 2025-Nov 2025

- Build deep learning system that detects infected and cancerous tissues from MRI, X-ray, and histopathology images for early diagnosis.
- Implemented using Python and TensorFlow with CNN transfer learning to automatically identify tumors in medical scans.
- The model highlights the affected regions in the images, enabling faster and more accurate medical diagnosis.
- Tech: Python, TensorFlow (Keras), CNN with MobileNet (Transfer Learning), NumPy, Matplotlib, Google Colab, Kaggle X-ray Dataset

Pitch-Port| Jun 2025 – Jul 2025

- Developed a working website to connect the right startups with the right investors and vice versa.
- Created using MERN Stack (MongoDB +Express +React +Node) React for the UI, Express + Node for API integration and authentication, MongoDB for secure storage.
- Enables Startups and investors to find each other with an inbuilt AI assistant that recommends according to your search.
- Tech: MongoDB, Express.js, React, Node.js.

Fuzzy Logic in Air Quality Management| Link March 2025 – April 2025

- Developed an air quality estimating system by applying fuzzy logic to estimate like human estimations.
- Created and launched a prototype website by using HTML, CSS and Python (Flask) assembled fuzzy membership functions and rule bases that takes parameters like CO, NO2, O3, PM10 and PM2.5 to classify air quality levels as Good, Moderate and Bad
- Transforms Numerical pollution parameters into clear labels, so that anyone can understand the air quality easily.
- Tech: Python, Flask, Rule-Based Fuzzy Logic, HTML, CSS, MySQL.

TRAINING

Full Stack (MERN) – W3grads | Certificate Jun 2025 - Jul 2025

- Developed and implemented a full-stack startup–investor matchmaking platform using the MERN stack, enabling secure authentication, intelligent recommendations via an AI assistant, and seamless frontend–backend integration to connect startups with relevant investors..
- Gained hands-on experience with backend logic, API-driven data flow, and CRUD Operations, strengthening overall software engineering fundamentals.

ACHIEVEMENTS

KPIT Sparkle 2025

- Participated in KPIT sparkle 2025, March 2025

CERTIFICATES

- Oracle Certified Foundations Associate Nov2025
- ChatGpt-4 Prompt Engineering (Infosys) | Certificate Aug 2025
- Computational Theory Language Principles & Finite Automata (Infosys) | Certificate Aug 2025
- Full Stack (MERN)with GenAI(W3grades) | Certificate Jun – Jul 2025

EDUCATION

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering (AI&ML); **CGPA: 7.9** Aug 2023 – current

Narayana Jr College Hyderabad,Telangana
Intermediate (MPC); **Percentage: 96.2%** Apr 2021 – Mar 2023

Krishnaveni talent School KondamallePally,Telangana
Matriculation; **Percentage: 100%** Apr 2020 – Mar 2021
